

## WHAT BOOK WERE YOU EMBARRASSED TO BE SEEN READING?

Oh my gosh, this book called *Sexstrology*, about what your sign means sexually—what you're attracted to. I was at the park with my kids. I read it with a magazine over the front so no one would see!

You mean like *She's Just Not That Into You*? No, nothing like that. Maybe *Harry Potter* in high school. I was reading it for extra credit and it turned into every book in the series.

As a joke someone gave me L. Ron Hubbard's Scientology book. I had it in my purse and I thought, if this falls out it's all over for me! Then again, maybe that could only help my career.

I listen to New Age-y self-help books on tape in the car, so sometimes you pull up to valet parking and it's blasting, like, "You are beautiful!" It's a little embarrassing.
